

Business Conditions Report

November 2017

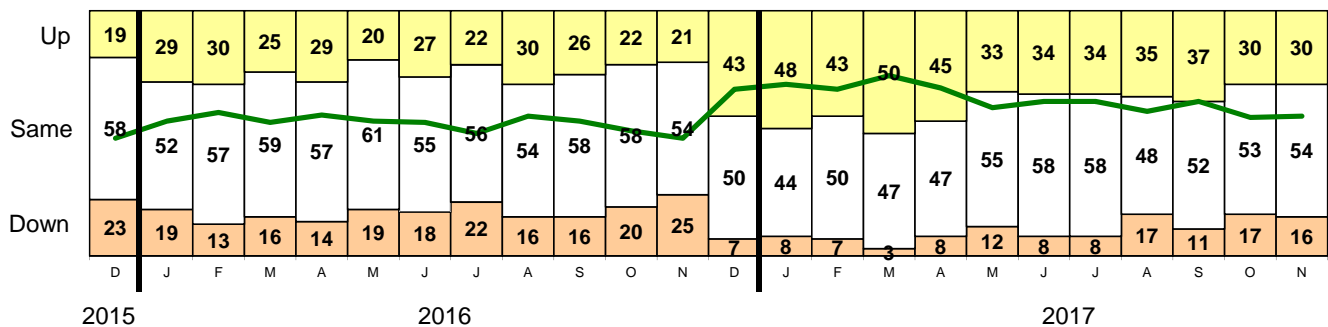

The first of every month, PMA's manufacturing members are asked to express their opinions on current and future business trends.

Monthly percentages for each question equal 100%. The trend line will move up or down depending on whether responses are more or less positive. The higher the trend line, the greater the ratio of respondents who answered with the top option as opposed to the bottom option. If there are an equal number of answers for the top, middle and bottom options, the trend line will be directly in the middle of the graph.

This month's report reflects the 114 PMA manufacturing members. Information is reported based on conditions as of November 1, 2017.
