

The expertise of **YELLOW** and **Roadway**.

Providing Superior Supply Chain Security

You're always interested in the **security** of your shipments. So are we.

The **2010 Security 500 report** ranks YRC Worldwide **number 1** in the comprehensive Transportation / Logistics / Supply Chain / Distribution / Warehousing category. The report, a well-respected annual benchmark study, is published in the November issue of **Security** magazine.

Sealed Divider™ Service is one example of our commitment to security. With Sealed Divider, your shipment is sealed with two uniquely numbered rod locks and travels undisturbed from pickup through delivery. This is an industry exclusive and one of the many ways we work to provide you with secure transportation solutions.

We consider risk management an integral part of doing business, it's part of everything we do. All members of the YRCW security force are former **law enforcement officials**, an added value for customers that is unique within the transportation industry.

If you have any security concerns, call us to speak directly with a security professional. The direct line for the industry's **best security team** is 1-800-383-8999.

Security is one of the many reasons to choose YRC for your supply chain needs. Members of PMA are entitled to significant savings on YRC services. If you are not enrolled in the YRC shipping program, you can enroll online at www.enrollhere.net, call 800.647.3061 or email associations@yrcw.com.
