

## Freezable Protection

For a lot of shipments, the temperature really doesn't matter. Then, there are those other shipments--freezable goods, chemicals and hazardous materials.

You have a significant investment in those shipments, and you don't want them to freeze. Fortunately, you're covered with YRC. We have a significant investment in the equipment needed to safely ship your freezable goods. We also have decades of proven, successful experience.

To protect freezable shipments, our Freezable Protection service utilizes:

- Weather monitoring
- Special handling procedures
- Tracking Indicators
- Insulated covers available to ensure products won't freeze at or below 32° F/1.5° C

In addition to protecting your freezable shipments while in transit, YRC has warm rooms for weekend usage when needed. Don't be left out in the cold. Make sure we have the equipment you need in your area, when you need it.

Let the experts at YRC help you with your next shipment. Contact a dedicated YRC representative at 800.647.3061 or [associations@yrcw.com](mailto:associations@yrcw.com). As a PMA member, you can receive significant savings with YRC. Simply enroll online at [enrollhere.net](http://enrollhere.net) or contact us by phone or email.
