

ONE POINT LESSON

Lesson Title: Stacking Containers Properly

Date:

Provided by Company Name:

Contact:

Summary:

Please reference the photo below – The containers are stacked improperly which could lead to someone getting injured. The Container on top is not stable and could fall over at any time. Any Associate stacking material must know that this is not the correct way. Containers can only be stacked on identical container types.

Undesirable Condition / Practice:

1. Stacking material which could cause a hazard in the workplace.
2. Improperly stacked material resulting in a workplace injury.
3. Stacking broken or damaged containers which may lead to container(s) falling.

Undesireable Condition / Practice:

Corrected / Proper Condition / Practice:

Corrected / Proper Condition / Practice / Benefits:

1. All containers are to be stacked in a secure and safe manner.
2. Containers must not overhang over the other container.
3. Containers must always be stacked on the same container type as one another. No exceptions.
